

Analog Devices Cork City Marathon

2024–2026 Race Analysis & Trends

Races: Full Marathon · Half Marathon · 10 km

Data source: Official timing results (Cork Data), 2024–2026.

	2024	2025	2026
Total finishers (all races)	9141	9515	9811
Full	1889	1979	2102
Half	3563	3875	4309
10K	3689	3661	3400

1. Participation

Total finisher numbers have grown across all three races. The Half Marathon and Full Marathon both show strong year-on-year increases. Female participation has risen steadily in every event.

Figure 6: Half Marathon finish time distribution

Figure 7: 10 km finish time distribution

3. Age Group Analysis

The 35–44 bracket is consistently the largest across all distances. Masters runners (45–54) have grown in the Full Marathon, and the 10 km attracts the broadest age spread including Juvenile and 65+ participants.

4. Key Insights

- **Consistent growth.** Finisher counts have increased year-on-year across all three races.
- **Rising female participation.** Female share has grown in every event, most markedly in the Half Marathon.
- **Improving Full Marathon times.** Median finish times for both genders have improved each year.
- **Core demographic: 35–44.** This age bracket provides the highest finisher counts across all races and years.
- **Masters growth.** The 45–54 bracket is growing in the Full Marathon, reflecting broader masters athletics trends in Ireland.
- **10 km diversity.** The 10 km draws the widest age range, from Juvenile to 70+, making it the most inclusive event.
