

Analog Devices Cork City Marathon

2024–2026 Race Analysis & Trends

Races: Full Marathon · Half Marathon · 10 km

Data source: Official timing results (Cork Data), 2024–2026.

	2024	2025	2026
Total finishers (all races)	8978	9397	9809
Full	1855	1944	2102
Half	3500	3806	4309
10K	3623	3647	3398

1. Participation

Total finisher numbers have grown across all three races. The Half Marathon and Full Marathon both show strong year-on-year increases. Female participation has risen steadily in every event.

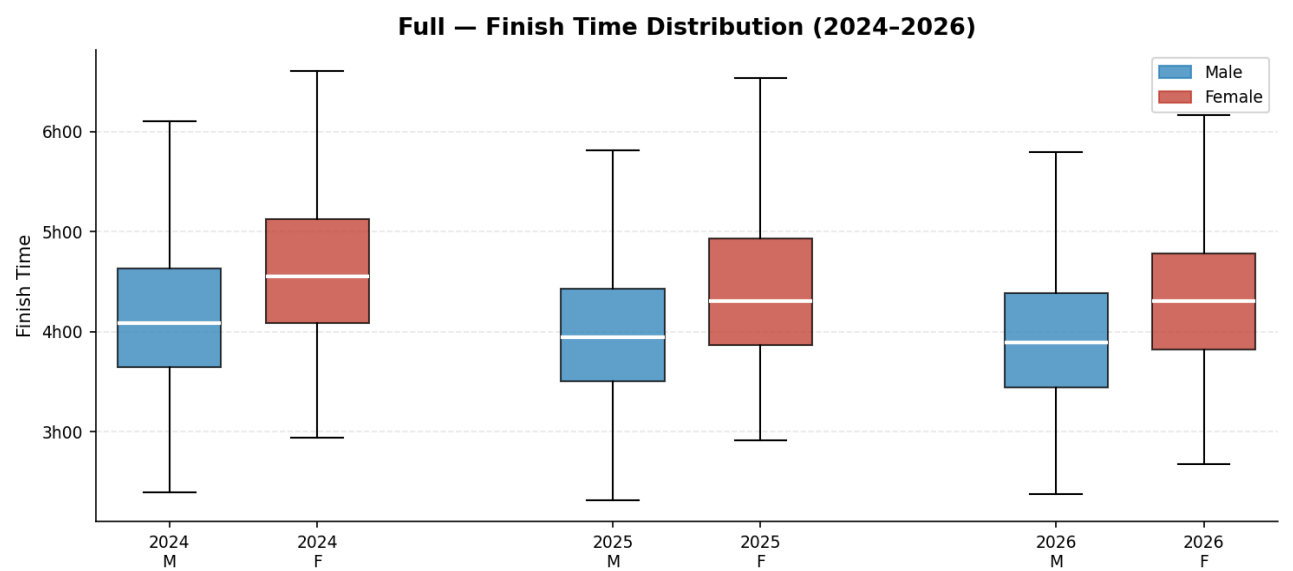

Figure 5: Full Marathon finish time distribution

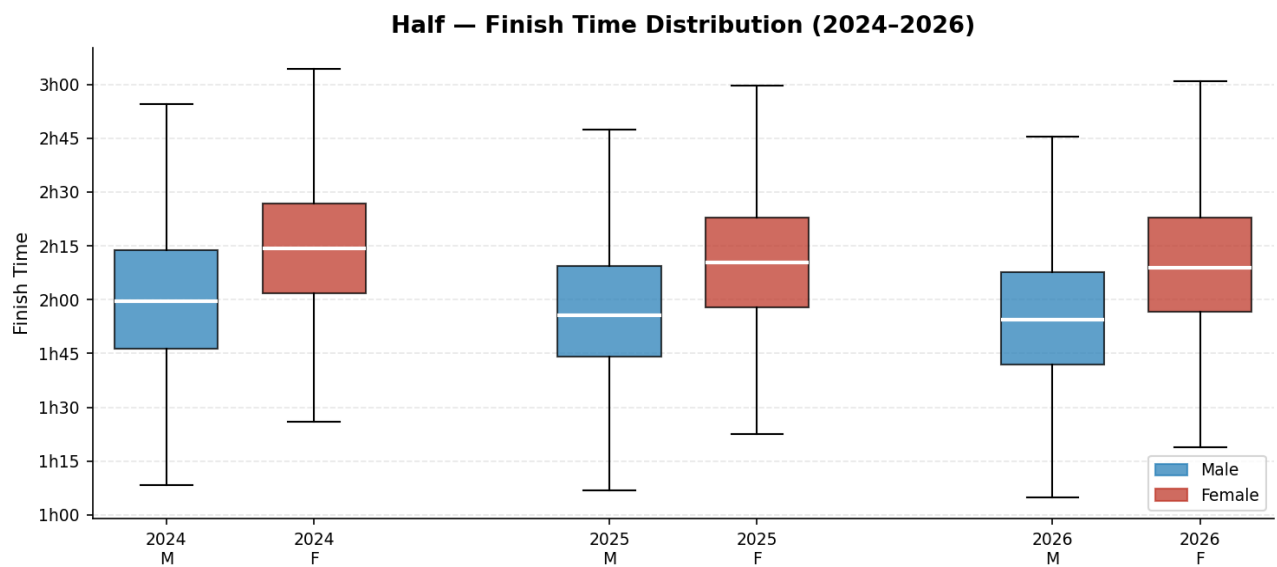

Figure 6: Half Marathon finish time distribution

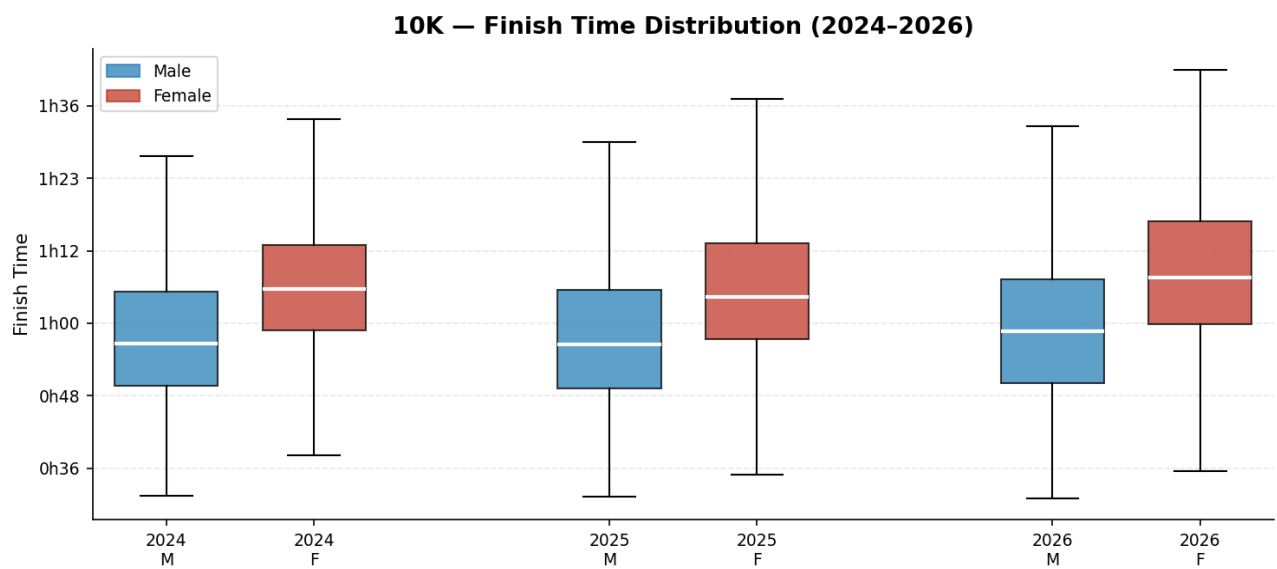

Figure 7: 10 km finish time distribution

3. Age Group Analysis

The 35–44 bracket is consistently the largest across all distances. Masters runners (45–54) have grown in the Full Marathon, and the 10 km attracts the broadest age spread including Juvenile and 65+ participants.

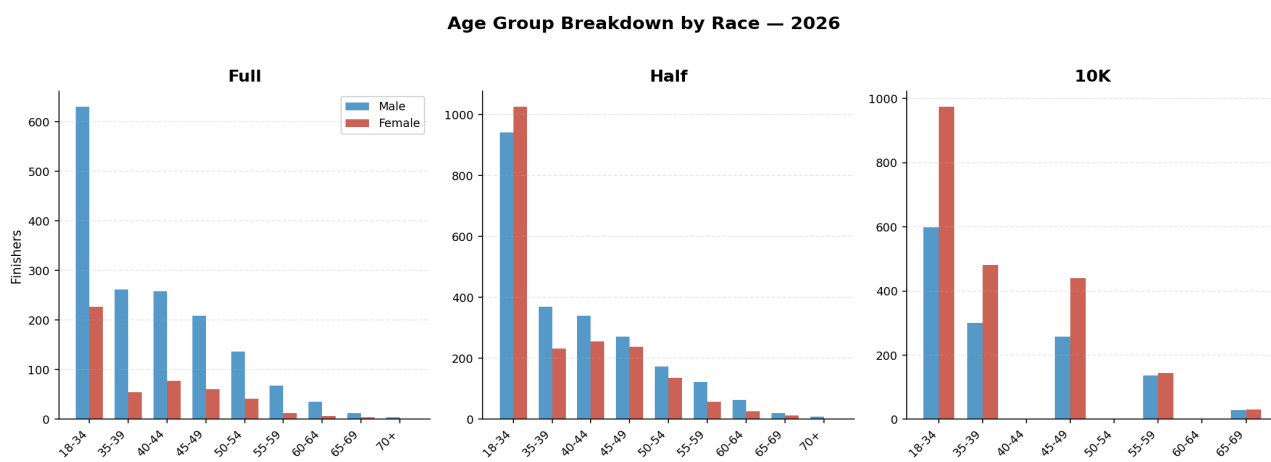

Figure 8: Age group breakdown by race — 2026

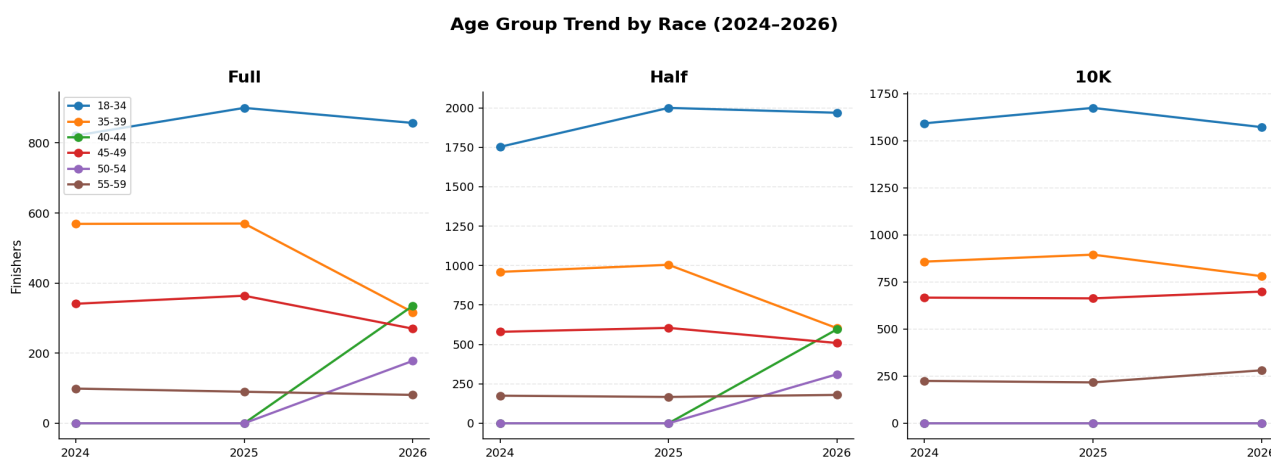

Figure 9: Age group finisher trend by race (2024–2026)

Club participation is shown as a word cloud of all clubs represented in the results. Words are sized by the number of finishers affiliated with each club.

5. Key Insights

- **Consistent growth.** Finisher counts have increased year-on-year across all three races.
- **Rising female participation.** Female share has grown in every event, most markedly in the Half Marathon.
- **Improving Full Marathon times.** Median finish times for both genders have improved each year.
- **Core demographic: 35–44.** This age bracket provides the highest finisher counts across all races and years.
- **Masters growth.** The 45–54 bracket is growing in the Full Marathon, reflecting broader masters athletics trends in Ireland.
- **10 km diversity.** The 10 km draws the widest age range, from Juvenile to 70+, making it the most inclusive event.
